

TRANSLATING SCIENCE INTO CLINICAL PRACTICE

# APACC 2024

**HYBRID CONFERENCE**  
HONG KONG  
27 - 29 JUNE 2024

ASIA-PACIFIC AIDS  
& CO-INFECTIONS  
CONFERENCE

## Call for APACC Fellows Class of 2025-2026!

The purpose of the APACC Fellows' program is to provide early-career investigators with an opportunity to **learn about HIV and co-infection research, conference development, and leadership through serving on the Organizing Committee of APACC.**

All fellows will receive support to attend **two conferences**, tailored mentorship, and the ability to shape a capacity-building session for early-career researchers.

### PROGRAM CHAIRS

**Grace Chung-Yan Lui**  
MBChB (Hons), FHKCP,  
FHKAM

The Chinese University of Hong  
Kong,  
Hong Kong

**Reena Rajasuriar**  
MPharm, PhD

University of Malaya,  
Malaysia

# HEAR FROM THE OUTGOING FELLOWS

**Rodenie Arnaiz Olete, MSc, RN**  
National Cheng Kung University, Taiwan

“Embracing the APACC 2023-2024 fellowship was a journey of growth. I had the privilege of shaping my own conference workshops, contributing to research as a peer reviewer of submitted abstracts, and collaborating on the conference program. It’s not just a fellowship; it’s a chance to evolve in a supportive community, where your contributions matter and connections thrive.” [>> Read More](#)

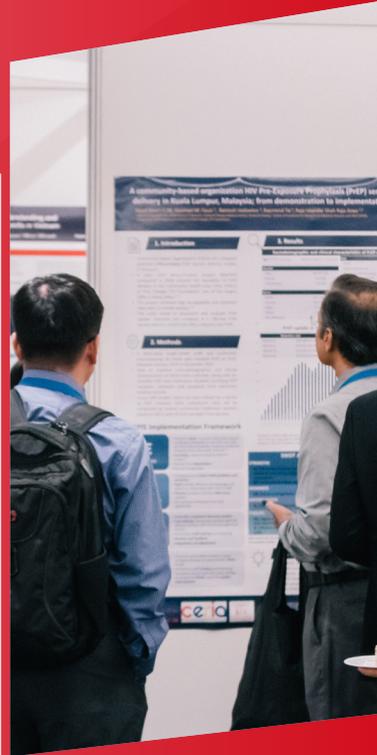

**Pui Li Wong, MBChB, MRCP(UK)**  
Universiti Malaya, Malaysia

“This fellowship has given me the opportunity to learn from experienced researchers and clinicians how large regional conferences are put together. It has also given me a platform to speak about topics that I am passionate about through the capacity-building sessions, with valuable guidance and mentorship from the faculty.” [>> Read More](#)

**Chunyan Li, MSc, PhD**  
The University of Tokyo, Japan

“Working with a global team of esteemed experts in HIV research to coordinate and plan APACC has proven to be an enlightening experience. This opportunity allowed me to keep up with the latest research trends across diverse fields (that otherwise I might get less exposure to in my daily work), expand my professional network, and most importantly – observe and learn how to facilitate the intellectual exchange in this field via organizing academic conferences like APACC.” [>> Read More](#)
